This is a hideous, diabolical offense against the sanctity and dignity of human life — and a horrible crime against helpless babies!

in effect through December 31 1999

Children are invaluable gifts from God, ... but the chilling body parts business sees them as top-dollar commodities of organs and tissue.

Yes, it is true.

The taxpayer-funded National Institutes of Health has actively engaged in research projects which help fund traffickers in “fetal tissue” — just an innocent sounding term for the body parts of murdered babies!

The NIH actually places *orders* for various baby body parts as if they were merchandise from a department store: “Tissue desired: fetal tibia and/or femur; spleen or thymus or liver; gestational week 19-23; quantity: 2-4 bones & either spleen (preferably) or thymus or liver ... receipt within 24 hours post-mortem (i.e. cells need to remain viable); preparation: standard (i.e. ... on wet ice)....”

Completely healthy babies are always a premium “commodity” on the baby body parts market: “I would prefer tissues without identified anomalies,” says a typical order form from the NIH’s Clinical Hematology Branch.

The NIH expended \$6 million in taxpayer money between 1993 and 1996 on fetal tissue research projects, according to the federal government’s 3/97 General Accounting Office report!

The Nazis of the 1930s likewise conducted medical experimentation on the castaways and helpless classes of their day — Jews, Gypsies, and others. These experiments often involved torture and death for the subjects — disturbingly like the outcome for today’s aborted babies. Let’s not be doomed to repeat these historical tragedies!

The baby parts market makes partial-birth abortion more popular than ever.

The partial-birth abortion technique delivers an almost entirely intact, fresh “specimen” to the baby parts traffickers — which means top dollar for the abortionists.

Likewise, other abortion techniques require the abortionist to bear the expense of disposing of

some portions of the “cadaver.” With partial-birth, there are no leftovers — and, in fact, the “traffickers” actually *pay the abortionist* for the privilege of carting off the corpse.

The horrible truth about partial-birth abortion:

Guided by ultrasound, the abortionist grabs the baby's leg with forceps.

The baby's leg is pulled out into the birth canal.

The abortionist delivers the baby's entire body, except for the head.

some portions of the “cadaver.” With partial-birth, there are no leftovers — and, in fact, the “traffickers” actually *pay the abortionist* for the privilege of carting off the corpse.

The horrible truth about partial-birth abortion:

1

Guided by ultrasound, the abortionist grabs the baby's leg with forceps.

2

The baby's leg is pulled out into the birth canal.

3

The abortionist delivers the baby's entire body, except for the head.

4

The abortionist jams scissors into the baby's skull. The scissors are then opened to enlarge the hole.

5

The scissors are removed and a suction catheter is inserted. The child's brains are sucked out, causing the skull to collapse. The dead baby is then removed.

STAND WITH CORAL RIDGE MINISTRIES TO CALL THE INDUSTRY PROVIDERS AND INDUSTRY USERS OF FETAL BODY PARTS TO DISCONTINUE USE OF FETAL TISSUE FROM ABORTED BABIES!
